

Stealth Goggle

Assembly Instructions

Contents:

- 2x Lens
- 1x Nose String
- 1x Blue Nose Cover
- 1x Rubber Strap

Instructions:

1. Thread **Nose String** thru the first **Lens** using the small hole located at the side of the **Lens**.
2. Slide the **Blue Nose Cover** over both ends of the **Nose String**.
3. Thread one end of the **Nose String** thru the remaining **Lens** and tie with a knot.
4. By sliding the string – you should be able to hide the knot inside the **Blue Nose Cover**.
5. To attach the **Rubber Strap** – push each end of the **Rubber Strap** thru the opening on the edge of the **Lens**. Pull equal lengths thru the **Lens** hole – so that you can tie the strap in a knot.
6. The **Rubber Strap** now acts as a double headband. If you find you need to tighten further you can untie and shorten up the length. Once you reach a comfortable length you can cut off any extra **Rubber Strap**.

Optional Nose Piece:

1. Some swimmers use a small section of the **Rubber Strap** in place of the **Nose String** and **Blue Nose Cover**.
2. Using about 1 ½ inches of the **Rubber Strap** thread the ends thru the String Holes. The **Rubber Strap** will stay secure without having to tie a knot.
